HUGGING FACE

United States

RE: Software Engineer Internship - Gradio

Dear Hiring Manager,

I am an enthusiastic and career-driven student with a major focused on Computer Information Systems at Boston University. I believe I can fulfill the Embedded Software Development Intern role and support HUGGING FACE's goals. My history of academic success and collaborative contributions illustrate a high level of dedication and excellence. I believe your organizational mission and my career path are well-aligned for experiential learning and growth in this field of study.

I am certain and experienced in python. I recently worked on a project on Audiobook using PDF using Python to build a PDF to audiobook that will convert text into speech putting what I learned during my graduate years in a practical perspective. Developing the code and using different types of modules like pyttsx3, PyPDF2, and OS on my project boosted my data science skills. I contributed to a Python project and used Python3 to analyze data from the PDF using code. I was able to successfully model the audiobook system using some of its parameters. As a Summer intern at HUGGING FACE, I would bring this new approach and commitment to success to my work. I bring strong leadership aspirations and key strengths in collaboration, critical thinking, and communication. Focused on continued growth and progress, I am skilled in improving operations and processes while inspiring teams to deliver superior performance. I bring strong leadership aspirations and key strengths in collaboration, critical thinking, and communication. Focused on continued growth and progress, I am skilled in improving operations and processes while inspiring teams to deliver superior performance.

Being familiar with the requirements of this role, I see that you're seeking skills in Python, C/C++, and Linux. I am eager to offer an entrepreneurial mindset to build creative solutions with HUGGING FACE. I've researched and learned a great deal about your mission-driven successes, and the privilege of working with your team would be exceptionally gratifying.

Thank you for your time and consideration in reviewing my qualifications for the Embedded Software Development Intern role. I will reach out within the upcoming week to address the next steps and inquire about scheduling an interview. If you would like additional information about my background and skills, please feel free to contact me.

Sincerely,

Nishant Sironjiya
